Be it enacted by the General Assembly of the State of South Carolina:

SECTION 1. Section 44-53-360 of the 1976 Code is amended by adding an appropriately lettered subsection at the end to read:

"(1) Initial opioid prescriptions for acute pain management or postoperative pain management must not exceed a seven-day supply, except when clinically indicated for cancer pain, chronic pain, hospice care, palliative care, major trauma, major surgery, treatment of sickle cell disease, treatment of neonatal abstinence syndrome, or medication-assisted treatment for substance use disorder. Upon any subsequent consultation for the same pain, the practitioner may issue any appropriate renewal, refill, or new opioid prescription.

(2) This subsection does not apply to opioid prescriptions issued by a practitioner who orders an opioid prescription to be wholly administered in a hospital, nursing home, hospice facility, or residential care facility.

(3) A practitioner who acts in accordance with the limitation on prescriptions as set forth in this subsection is immune from any civil liability or disciplinary action from the practitioner's professional licensing board.

(4) As used in this subsection:

(A) 'Acute pain' means pain that a practitioner reasonably expects to last for three months or less, whether resulting from disease, accident, intentional trauma, or other cause. The term does not include 'chronic pain' or pain being treated as part of cancer care, chronic care, hospice care, palliative care, major trauma, major surgery, treatment of sickle cell disease, treatment of neonatal abstinence syndrome, or medication-assisted treatment for substance use disorder.

(B) 'Chronic pain' means pain that typically lasts for longer than three months or that lasts beyond the time of normal tissue healing.

(C) 'Postoperative pain' means acute pain experienced immediately after a surgical procedure.

(D) 'Surgical procedure' means a procedure performed for the purpose of altering the human body by incision or destruction of tissues as part of the practice of medicine such as diagnostic or therapeutic treatment of conditions or disease processes by use of instruments and includes lasers, ultrasound, ionizing radiation, scalpels, probes, or needles that cause localized alteration or transportation of live human tissue by cutting, burning, vaporizing, freezing, suturing, probing, or manipulating by closed reduction for major dislocations and fractures, or otherwise altering by any mechanical, thermal, light-based, electromagnetic, or chemical means."

- (2) a comparison of the practitioner's number of milligrams prescribed per month by therapeutic class code over by specific substances to peer averages by specialty throughout the State;
- (3) the total number of patients receiving ninety morphine milligram equivalents (MMEs) or more a day;
- (4) the total number of patients receiving opioid medications for thirty days or more;
- (5) the total number of patients receiving opioids and benzodiazepines medications at the same time;
- (6) the total number of patients issued prescriptions from three or more practitioners;
- (7) the total number of patients filling prescriptions at three or more pharmacies;
- (8) the total number of patients with controlled substance prescriptions whose dispensing dates overlap;
- (9) the total number of patients obtaining refills on their prescriptions more than one week early; and
- (10) the total number of prescription drug monitoring program queries made by the practitioner and a ratio of the queries to the number of patients or prescriptions issued.

The report card also must provide data on the number of practitioners registered against which the comparisons of items (1) and (2) are being made and any other demographic data relating to the pool of practitioners and may include regional or nationwide prescribing comparison data that would be useful to the practitioner.

Prescription report cards, data, documents, records, and any other information accessed or compiled in preparing prescription report cards, are confidential and not subject to discovery, subpoena, or introduction into evidence in any civil action, unless confidentiality is waived by the practitioner.

(B) The department shall coordinate with the Board of Medical Examiners and any other appropriate professional boards as part of the development and implementation of a prescription report card program. The department may contract with another agency of the State or with a private vendor, as necessary, to ensure effective operation of the report card program, as provided in Section 44-53-1660, and may apply for public or private grants or other funding to develop, implement, and maintain the program."
